PROJECTS

Vigilantes

2021

Team project of an Android Kotlin application to assist law enforcement officers in documenting automotive incidents

- Communicated and collaborated with cross-functional team members to develop the application
- Coded primary data structures and functions used in the application
- Provided documentation for data structures and functions, resulting in a smoother developing experience for the team
- Debugged errors to ensure that the application user experience was errorfree and seamless

Confessional

2023

Personal project that allows users to send confessions into a server to be seen by other users

- Created and designed the website with React to ensure an accessible and intuitive user interface
- Coded the server with Node.js and Express to store and retrieve user inputs
